Guest lecture On Laser and it's applications

A guest lecture was organized by Applied Science department at KC College of Engineering & IT, Nawanshahr. Ms. Anika Lecturer of Physics from KCPC delivered the lecture to 2nd semester students. Topic of the lecture was "Laser and it's applications" in which she explained to the students that Laser is a device that stimulates atoms or molecules to emit light at particular wavelength and amplifies that light, typically producing a very narrow beam of radiation. Ms. Anika briefly explained about the laser and its applications
